

JEFFRIN RIJO V C

Full Stack Engineer | Software Developer

+91 9442798022 • jeffrinrijo4@gmail.com • github.com/jeff3joo • linkedin.com/in/jeff3joo • jeff3joo.netlify.app

PROFESSIONAL SUMMARY

Full Stack Engineer with 2+ years of hands-on experience designing, developing, and maintaining web applications. Proficient in JavaScript, TypeScript, React.js, Node.js, Express.js, and REST APIs. Experienced in integrating backend services with frontend workflows. Comfortable working independently on features, writing clean and maintainable code, debugging production issues, and collaborating effectively in Agile/Scrum team environments. Strong problem-solver passionate about delivering scalable, high-quality software solutions.

EXPERIENCE

VisAI Labs | Full Stack Engineer | Jan 2025 – May 2026

- Contributed to the development and maintenance of **vMeasure-CodeScan**, an Electron-based enterprise application by developing React.js frontend features, implementing Node.js backend functionality, and integrating barcode SDK workflows.
- Developed a **C++ SDK wrapper using Node API** integrating Scandit and Zebra AVL APIs, reducing integration effort by approximately **40%** through reusable barcode processing components.
- Took ownership of maintaining and enhancing a **Chrome Extension**, implementing new features, integrating internal REST APIs, supporting script injection on customer websites, and resolving production issues across multiple releases.
- Integrated multiple barcode SDKs and third-party APIs, performed testing and validation, and improved application reliability across production environments.
- Maintained Jenkins CI pipelines supporting automated builds, packaging, and release workflows.
- Collaborated with cross-functional teams in Agile/Scrum environments, participating in sprint planning, debugging, production support, code reviews, and continuous product improvements.

VisAI Labs | Full Stack Engineer Intern | Feb 2024 – Dec 2024

- Contributed to the development of **vMeasure-CodeScan** by building React.js frontend features, implementing Node.js backend functionality, and assisting with Electron and SDK integration.
- Developed serial port communication between Raspberry Pi devices using Node.js and **WebSocket communication between applications** for real-time data transfer.
- Debugged and resolved frontend and backend issues, improving application stability and supporting production releases.
- Collaborated with engineers to implement new features, validate application functionality, and deliver product enhancements.

Alhansat Solutions | Full Stack Developer Intern | Sep 2023 – Oct 2023

- Developed frontend components using React.js and implemented backend functionality with Node.js for a Flowchart Maker web application.
- Collaborated with the development team to enhance application functionality and improve user experience.

FREELANCE & CLIENT PROJECTS

Independent Software Developer | Aug 2026 – Present

Billing & Invoice Management System | Jeff Systems

- Developed a **billing and invoice management web application** for a computer hardware and services business using **Next.js, TypeScript, Supabase, and Netlify**.
- Built product management and end-to-end billing workflows supporting **customer details, product search, quantities, selling prices, discounts, and tax calculations**.
- Implemented inline product creation that adds new products to the database and automatically includes them in the active bill, along with editable invoice generation and PDF downloads.

- Integrated **Supabase Authentication** and database services, and developed bill history functionality for **viewing, editing, deleting**, and downloading previously generated bills.

UI/UX Design | Promethium Labs

- Designed UI/UX concepts and application flows in Figma for an AI-powered digital advertising platform, translating business requirements into structured screens and user journeys.

PROJECTS

PulseRoom | Next.js, TypeScript, Node.js, Express.js, Socket.IO, MongoDB, JWT

- Designed and built a full-stack real-time room-based chat platform — implemented Next.js frontend with TypeScript, developed Node.js/Express.js backend, and integrated Socket.IO for real-time messaging.
- Implemented secure authentication and authorization system — built JWT-based email/password login, OTP-based password recovery, and role-based authorization (Owner/Manager/User) with room management features.
- Built real-time communication layer using Socket.IO — implemented live messaging, presence tracking, and user synchronization with MongoDB for persistent storage.

Portfolio | React.js, Material UI, WebGL | [GitHub](#) • [Live Demo](#)

- Built a responsive portfolio web application using React.js and Material UI — integrated a WebGL 3D viewer and ensured cross-device responsiveness.

SKILLS

Frontend: React.js, Next.js, Redux, Material UI, HTML5, CSS3, JavaScript, TypeScript

Backend: Node.js, Express.js, REST APIs, WebSockets, C++

Authentication: JWT, OTP-based auth, Email/Password Login

Languages: JavaScript, TypeScript, Bash, C++, SQL, Python

Desktop & Real-Time: Electron, Socket.IO, Event-driven architecture

Design: Figma, Adobe XD

Tools & Practices: Git, GitHub, Jenkins (CI), Linux, Agile/Scrum

Other: Unity, Unreal Engine, Blender

EDUCATION

B.Tech — Artificial Intelligence & Data Science

Velammal Institute of Technology | 2020 – 2024 | CGPA: 8.42 / 10

CERTIFICATIONS

- Meta Front-End Developer Professional Certificate — Coursera
- Developer Foundations, Node JS, React JS — NXT Wave
- Unreal Engine 5 C++ Game Development — Udemy
- Google UX Design — Coursera
- Programming Foundations — NXT Wave
