EXPERIENCE

VisAI Labs :

Full Stack Engineer Intern : Feb 2024 – Dec 2024

Full Stack Engineer Trainee : Jan 2025 – Present

- Improved **reliability**, **accuracy**, and **processing performance** of the vMeasure-CodeScan barcode scanning system which reduced **70%** time taken to scan barcode.
- Developed a high-performance **C++ SDK wrapper** integrating Scandit and Zebra AVL barcode detection APIs.
- Integrated multiple barcode SDKs, conducted **accuracy testing**, and **automated data validation** workflows.
- Built **automation** and **initialization scripts** to support system setup, long-running processes and testing.
- Enhanced **Chrome extension** functionality by integrating internal APIs to trigger barcode workflows and dynamically **inject data** into active web pages.
- Maintained** and **optimized** Jenkins pipelines for build automation and CI processes.

Alhansat Solutions : Full Stack Developer Intern Sep 2023 – Oct 2023

- Co-developed a **Flowchart Maker** web tool with modular architecture.
- Built **drawing features**, **module interaction**, and **export pipeline**.

PROJECTS

Unreal Engine C++ Projects

RunRail – 3D Endless Runner (Unity C#)

- Built core **endless runner** mechanics including 3-lane movement, and obstacle avoidance
- Developed procedural track generation with **object pooling** to optimize performance and ensure smooth gameplay
- Implemented scoring system with dynamic difficulty scaling.
- <https://bit.ly/3QNHUUR> - Find **Demo Video**

Battle Blaster v2 - Shipped Survival Tank Shooter (Unreal Engine C++)

- Designed core gameplay loop focused on **survival** and reward-based progression
- Designed **enemy AI** with state transitions (Chase → Attack).
- Designed **respawn logic** with **position tracking**.
- Added gameplay feedback using **particles**, **sound**, and **camera shake**.
- <https://bit.ly/4u17jcm> - Find **Demo Video**

Web Projects

- Portfolio** platform with **3D model viewer** (GLB assets) Live Demo: <https://jeff3joo.netlify.app>
- Weather Web App** using **OpenWeatherMap API** with responsive UI.
- Rock-Paper-Scissors** browser game with **score tracking** and animations

SKILLS

Game Development: Unreal Engine 5 (C++), Unity (C#), Gameplay Programming, AI Systems

Programming: C++, C#, JavaScript, React, Node.js

Tools: Blender, Git, Jenkins

EDUCATION

B.TECH (AI & Data Science) - Velammal Institute of Technology (2020-2024) **8.47 CGPA**

HSC – Maria Rafols Matriculation Higher Secondary School 2020 **71%**

CERTIFICATIONS

- Meta Front-End Developer Professional Certificate (Coursera)
- Complete Blender Creator: 3D Modelling (Udemy)
- Unreal Engine 5 C++ Game Development(Udemy)
